

COMPREHENSIVE KNOWLEDGE BASE

National Identification Services in Tanzania

Responsible Authority: National Identification Authority (NIDA)

Primary Digital Portals: eonline.nida.go.tz and services.nida.go.tz

Reference Legal Framework: Registration and Identification of Persons Act, Cap. 36

1. General Overview

National identification is the process through which NIDA registers and identifies eligible persons and maintains identity information in the national identification system. The process involves demographic information, supporting documents and biometric information. For citizens, registration results in the assignment of a National Identification Number (NIN) and, where applicable, issuance of a physical national identification card.

This knowledge base covers first-time registration, NIN retrieval, foreign resident registration, investor identification, replacement of lost or damaged cards, information amendments, verification services, application tracking and exceptional circumstances.

2. Service Categories

2.1 First-Time Citizen Registration

This is the initial enrolment process for eligible Tanzanian citizens. The applicant provides identity, citizenship and residence evidence, completes the required application process, and attends a designated registration point for biometric capture. After successful verification and deduplication, a NIN is assigned and the physical card can proceed to issuance.

2.2 NIN Retrieval

NIN retrieval allows an already registered person to recover or query their identification number without necessarily waiting for a physical card. Depending on the current service channels, applicants may use online services, USSD or NIDA offices. The applicant should use the official channel currently provided by NIDA.

2.3 Foreign Resident Registration

Lawfully resident non-citizens may be registered and identified through NIDA procedures applicable to their immigration status. Relevant residence, work, passport and supporting documents are used to establish identity and legal residence.

2.4 Investor Identification

Investors may have an identification workflow connected with investment registration and residence documentation. The application can require evidence from the Tanzania Investment Centre (TIC), company or business registration authorities, tax authorities and immigration authorities, depending on the applicant's circumstances.

2.5 Lost Card Replacement

A registered person whose physical NIDA card has been lost may apply for replacement. The process may involve reporting the loss, providing identification information and completing the prescribed payment and replacement procedure.

2.6 Damaged or Defaced Card Replacement

A damaged card may be replaced when the physical card is worn, broken, defaced or otherwise unusable. The existing damaged card may need to be surrendered so that the record can be processed for replacement.

2.7 Information Update and Amendment

NIDA records may require updates when personal information changes or when an error is identified. Supporting legal or official documentation is normally required to substantiate the requested amendment.

2.8 Third-Party Identity Verification

Authorized institutions such as banks, telecommunications operators and government agencies may use identity verification services to confirm whether submitted identity information corresponds with NIDA records. Access to such services is subject to applicable authorization and procedures.

3. Requirements for First-Time Citizen Registration

The reference material identifies the following documents as commonly required or potentially useful. The exact requirements should be confirmed with NIDA for the applicant's particular case.

- Birth Certificate or Age Certificate issued through the responsible civil-registration authority, where required.
- Parents' NIDA cards or parents' birth certificates, where applicable.
- Academic records such as Primary School Leaving Certificate (PSLC), Form Four/CSEE or Form Six/ACSEE, where applicable.
- Introduction or residence/citizenship confirmation from the relevant WEO/VEO where required.
- Voter identification or public-service employment information, where available and relevant.
- Original supporting documents for physical verification at enrolment.

4. Requirements for Legal Foreign Residents

- Valid foreign passport.
- Valid immigration documentation, including the relevant residence and/or work permit.
- For dependants, principal sponsor's residence documentation and evidence of the family relationship where required.
- Additional documents requested by NIDA or immigration authorities according to the applicant's status.

5. Requirements for Investors

- Tanzania Investment Centre (TIC) registration or investment documentation, where applicable.
- Company incorporation or registration documents from the relevant authority, where applicable.
- Taxpayer Identification Number (TIN), where applicable.
- Business licence, where applicable.
- Valid passport for foreign applicants.

- Valid immigration/residence documentation for foreign investors.
- Other documents required to establish the investor's identity and legal status.

6. Requirements for Lost Card Replacement

- Police loss report identifying the lost NIDA card or relevant identification details, where required.
- Sworn affidavit of loss where required.
- Proof of payment associated with the applicable government control number.
- Available NIN, previous card information or other identity details.
- Additional documents requested by NIDA during replacement.

7. Requirements for Damaged Card Replacement

- Original damaged NIDA card for surrender where required.
- Proof of payment.
- NIN or other identification information.
- Any additional documentation requested by the NIDA registration office.

8. Requirements for Bio-Data Amendment

- Current NIDA card or NIN.
- Official evidence supporting the requested amendment.
- Marriage certificate or other legal evidence for changes arising from marriage, where applicable.
- Deed Poll, Gazette publication or other legally required documentation for substantial legal name changes, where applicable.
- Academic or other official records where they are relevant to correcting an error.
- Original documents for verification when requested.

9. Fees and Payment

The following amounts are reference figures supplied for this knowledge base. Government fees and procedures can change, so the chatbot should verify current tariffs before directing a user to make payment.

Service	Reference Fee	Notes
First-time citizen registration	Free	Reference information; confirm current policy.
Foreign resident/investor registration	USD amounts may depend on status	Confirm current NIDA tariff and applicant category.
First lost-card replacement	TZS 20,000	Reference figure.
Second lost-card replacement	TZS 30,000	Reference figure.
Third lost-card replacement	TZS 50,000	Reference figure.
Damaged-card replacement	TZS 20,000	Reference figure.
Foreign/investor replacement	USD amount depends on category	Confirm current tariff.

The reference material lists foreign replacement figures of USD 50 for investors, USD 25 for employees, and USD 10 for students, missionaries and dependants. These figures should be treated as reference values until confirmed against the current official tariff.

10. Payment Mechanics

Where a fee applies, the applicant may receive a government control number through an official NIDA service channel or registration office. Payment may be made through supported mobile-money services or participating banks. Applicants should retain the control number, electronic receipt, transaction reference and application/tracking information until the service is completed.

- M-Pesa.
- Tigo Pesa.
- Airtel Money.
- HaloPesa.
- Participating commercial banks such as NMB, CRDB, NBC and PBZ, where currently supported.

11. End-to-End Citizen Registration Workflow

1. Pre-registration: access the official online registration service where available and complete the required demographic and background information.
2. Application review: check entered information carefully before submitting the application.
3. Form generation: print the completed form where the procedure requires a printed application form and complete the required signatures/verification.
4. Local verification: obtain WEO/VEO or other local verification when required.
5. Physical enrolment: attend the designated NIDA registration office with the application and original supporting documents.
6. Document verification: the registration officer checks the documents and confirms the applicant's information.
7. Biometric capture: the officer captures the required biometric information, which may include fingerprints, facial photograph and signature.
8. Deduplication: biometric and demographic data are checked against existing records to identify possible duplicate registrations.
9. NIN assignment: after successful clearance, the person's unique NIN is assigned or confirmed.
10. Card production: an eligible cleared record proceeds through the card production process.
11. Notification and collection: the applicant follows the official instructions for notification and collection. Additional identity or biometric verification may be performed at collection.

12. Biometric Capture and Deduplication

Biometric enrolment is an important part of identity assurance. Fingerprints, facial imagery and signatures may be captured according to the applicable NIDA process. The captured information can be compared against existing records to identify duplicate enrolments and strengthen the uniqueness of an individual's identity record.

The reference material describes automated fingerprint-based deduplication and a 20-digit NIN. The chatbot should avoid guaranteeing a particular biometric modality, NIN format or processing time unless the current official NIDA documentation confirms it.

13. Card Production and Issuance

After successful enrolment and clearance, the record can enter the card production and personalization process. The physical card contains identity information and security features. Once the card is available at

the designated collection point, the applicant follows NIDA's collection instructions and presents the required identification or tracking information.

14. NIN Retrieval and Application Tracking

A registered person may need to retrieve their NIN or track the progress of an application. Available options can include official online services, USSD services or visiting the NIDA office where registration was completed. The exact channel and procedure should be confirmed against current NIDA instructions.

- Keep the registered phone number active.
- Keep the application/tracking slip or reference number.
- Check official NIDA online services where available.
- If a tracking document is lost, provide sufficient identity information at the responsible NIDA office.
- Do not share a NIN or other identity credentials publicly.

15. Special Case: Applicants Without Parents' Records

Where parents are deceased, unavailable or do not have formal identification records, the normal supporting-document pathway may not be possible. The applicant may need alternative evidence such as death certificates, local administrative verification or other documentation prescribed by NIDA. The chatbot should not automatically guarantee that a particular local committee or document will be accepted; it should direct the applicant to the responsible NIDA office for the applicable alternative procedure.

16. Special Case: Border Community Residents

Applicants living in border areas may receive additional scrutiny where citizenship or identity requires clarification. Additional verification can involve NIDA, immigration and relevant local authorities. The purpose is to protect the integrity of the national identification register while allowing legitimate residents and citizens to establish their identity.

17. Physical Disability or Difficult Biometrics

Some applicants may be unable to provide conventional fingerprints because of missing fingers, permanent physical conditions, age-related changes or other circumstances. Registration officers may apply the appropriate alternative biometric or exception procedure and record the limitation. Applicants should inform the officer of the condition rather than attempting to force an unusable biometric capture.

18. Citizens Born Abroad

Tanzanian citizens born outside the country may need to establish citizenship and identity before NIDA enrolment. Relevant evidence can include citizenship documentation, foreign birth records and immigration-related documentation. The exact documents depend on how citizenship was acquired and the applicant's circumstances.

19. Name and Bio-Data Mismatch

Differences between NIDA information and information held by banks, telecommunications companies, schools or other institutions can cause identity-verification failures. The applicant should first determine

which record contains the error and then use the appropriate correction or verification process. Supporting legal documents may be required before NIDA changes its record.

20. Biometric Verification Failure

A fingerprint or biometric verification attempt may fail because of poor capture quality, changed or damaged fingerprints, equipment issues, incorrect records or other technical factors. If repeated attempts fail, the person may be directed to a NIDA office for examination of the record and possible biometric update or re-capture.

21. Delayed Card Printing

A person may receive or know their NIN before the physical card becomes available. The NIN can be used for identity-related services where the receiving institution accepts NIN-based verification. The chatbot should not universally claim that a printed NIN slip or verification letter is accepted for every transaction; acceptance depends on the institution and current rules.

22. Lost Tracking Slip or Reference

If a manually registered applicant loses the tracking slip, the applicant should contact the NIDA registration office where enrolment occurred or use an official tracking channel if one is currently available. The applicant should provide identifying information that allows staff to locate the application securely.

23. Common Administrative Bottlenecks

- Missing supporting documents.
- Names or dates that do not match across documents.
- Unclear or damaged documents.
- Biometric capture or verification failure.
- Duplicate-record concerns during deduplication.
- Payment not correctly associated with the application.
- Incorrect contact information.
- Delayed card production or dispatch.
- Changes in citizenship, residence or personal information requiring additional verification.

24. Security and Privacy Guidance

National identification information is sensitive identity data. Applicants should protect their NIN, card details, passwords, OTPs and copies of identity documents. The chatbot should never ask users to publish their full NIN, password, OTP, PIN or complete identity-document details in a public conversation.

- Do not share an OTP or account password with another person.
- Do not post a full NIDA card image publicly.
- Use official NIDA portals rather than links received from unknown sources.
- Verify the identity of anyone requesting copies of identification documents.
- Report suspected identity misuse through appropriate official channels.

25. Chatbot Decision Flow

12. Identify the user's objective: first registration, NIN retrieval, foreign resident registration, investor registration, replacement, amendment, verification or tracking.
13. Determine the user's category: Tanzanian citizen, foreign resident, investor, dependant or special-case applicant.
14. Determine whether the person is already registered.
15. Identify the specific document problem, if any.
16. Provide only the requirements relevant to that service.
17. Explain the next operational step.
18. If payment is required, explain the control-number/payment process without inventing current tariffs.
19. If the case involves a legal exception, citizenship dispute, adoption, missing parent records or conflicting identity information, recommend confirmation with NIDA or the relevant authority.
20. Never request unnecessary sensitive information in the chatbot conversation.

26. Frequently Asked Questions

What is a NIN?

A NIN is the National Identification Number assigned to a registered person in the national identification system.

Can I retrieve my NIN without having the physical card?

If the current NIDA service supports NIN retrieval through online, USSD or other official channels, a registered person may be able to retrieve it without waiting for card collection.

What should I do if my NIDA card is lost?

Follow the official lost-card replacement procedure, including any required police report, affidavit, payment and NIDA verification.

What if my card is damaged?

Keep the damaged card and follow the NIDA replacement procedure. The card may need to be surrendered.

What if my name is wrong on my NIDA record?

Use the information-amendment process and provide official evidence supporting the requested correction.

What if fingerprints cannot be captured?

Tell the registration officer. An appropriate exception or alternative biometric procedure may be applied.

What if my payment is made but the application still shows unpaid?

Keep the payment receipt and transaction reference and contact the relevant NIDA service channel for reconciliation. Avoid duplicate payment until instructed.

27. Applicant Checklist

Before Registration

- Confirm eligibility and service category.
- Gather original supporting documents.
- Check that names and dates are consistent.
- Prepare required local-authority documentation if applicable.

- Complete the online application where the current procedure requires it.

During Enrolment

- Carry the printed application form if required.
- Carry original supporting documents.
- Attend the designated NIDA office.
- Provide the required biometrics.
- Review information carefully before final confirmation.

After Enrolment

- Keep the NIN or application reference securely.
- Keep payment receipts where applicable.
- Monitor the official application status.
- Respond to any query or request for additional documentation.
- Follow official instructions for card collection.

28. Data-Quality Rules for the AI Knowledge Base

- Treat fees as time-sensitive reference information.
- Treat portal addresses and procedures as information that should be periodically verified.
- Do not invent processing times, office locations, USSD codes, control-number expiry periods or acceptance policies.
- Do not guarantee approval or card-collection dates.
- Distinguish citizen registration from foreign-resident and investor procedures.
- For legal or citizenship disputes, recommend official authority review.
- Prefer the user's exact service category before presenting requirements.
- Never expose or request unnecessary sensitive identity credentials.

29. Core Information Summary

Category	Key Information
Responsible Authority	National Identification Authority (NIDA)
Main Services	Registration, NIN retrieval, replacement, amendments, verification and special-category registration
Citizen Registration	Initial enrolment with demographic and biometric verification
Foreign Residents	Registration subject to lawful residence and applicable documentation
Investors	Identification linked to applicable investment, business and immigration documentation
NIN Retrieval	Use current official NIDA retrieval channels
Lost Card	Replacement through prescribed loss-reporting and payment procedures
Damaged Card	Replacement, normally involving surrender of damaged card where required
Amendments	Supported by official evidence for the requested change
Verification	Authorized third-party identity verification
Payment	Control number and supported official payment

	channels where fees apply
Key Risks	Identity mismatch, biometric failure, duplicate records, missing documents and payment reconciliation
