

TANZANIA GOVERNMENT SERVICES

MASTER KNOWLEDGE BASE

Citizen-service reference for an AI/RAG government-services chatbot

Seven core service categories • Authorities • Digital channels • Contact routes • Service scope • Escalation guidance

Prepared: 6 September 2026

1. Purpose and Use

This master document consolidates seven Tanzanian public-service domains into one reference for chatbot knowledge-base design. It helps the chatbot identify the responsible authority, direct users to appropriate official channels, explain common workflows, and provide escalation routes when officer or physical verification is required.

Accuracy rule: fees, requirements, office locations, processing times, portals and contacts can change. Time-sensitive information should be verified against the responsible authority's current official channel before being presented as current.

2. Master Service Directory

#	Service domain	Responsible authority	Primary digital channel	Primary physical/contact route
1	Birth certificates & civil registration	RITA	eRITA: erita.rita.go.tz	RITA offices / District Registrars
2	National identification	NIDA	services.nida.go.tz	NIDA regional/district offices
3	Passport & travel documents	Immigration Department	Official e-Immigration portal	Immigration offices / Tanzanian missions abroad
4	TIN services	TRA	taxpayer.tra.go.tz / TRA TIN services	TRA tax offices
5	Driving licences	TRA + Traffic Police	TRA online driving-licence route	TRA licence offices / Traffic Police testing points
6	Tax clearance	TRA	taxpayer.tra.go.tz	TRA tax offices
7	Land services	MLHSD	eardhi.lands.go.tz	Land offices / relevant local authorities

3. Birth Certificate & Civil Registration

Responsible authority	Registration, Insolvency and Trusteeship Agency (RITA)
Official/primary channels	eRITA: https://erita.rita.go.tz RITA website: https://www.rita.go.tz Head office: RITA Tower, 4 Mtaa wa Simu, Dar es Salaam Telephone: +255 (22) 2924180 / 181 Email: info@rita.go.tz Physical route: RITA branches and District Registrars
Core services	• Birth registration within 90 days • Late birth registration • Certificate copies/replacement • Corrections and amendments • Birth-record verification • Foreign birth registration

Operational summary

RITA's current public guidance supports online birth registration through eRITA. Hospital births require birth notification; home births should be reported through the appropriate local authority/District Registrar route. The portal can generate a payment control number and allows application-status checking.

Escalation and support

If an application is queried or requires original-document inspection, follow the eRITA instructions or contact the relevant RITA office. Do not invent fees or requirements not confirmed by the current official source.

4. National Identification Services

Responsible authority	National Identification Authority (NIDA)
Official/primary channels	NIDA Online Services: https://services.nida.go.tz Self-service includes NIN lookup, control-number generation and bill printing Physical route: NIDA registration/service offices
Core services	• First-time citizen registration • NIN retrieval • ID replacement • Information amendment • Stakeholder identity verification

Operational summary

NIDA's current online-services portal provides citizen self-service for finding a NIN and generating control numbers for eligible services. Physical attendance may be required for biometric capture, identity verification or exceptional cases.

Escalation and support

For biometric, identity-record or application problems that cannot be resolved online, direct the user to NIDA. Never ask users to publish NINs, passwords, OTPs or biometric information in the chatbot.

5. Passport & Travel Documents

Responsible authority	Immigration Department, Ministry of Home Affairs
Official/primary channels	Official e-Immigration portal: https://eservices.immigration.go.tz Physical route: designated Immigration offices Citizens abroad: nearest Tanzanian Embassy/High Commission/Consulate where services are available
Core services	• Ordinary passport • Passport renewal/replacement • Lost or damaged passport • Service/official passport • Diplomatic passport • Emergency travel documents

Operational summary

Typical processing involves online application, document review, payment, physical verification/biometrics where required, production and collection. The exact requirements depend on passport type and applicant circumstances.

Escalation and support

Citizenship disputes, lost-document complications and urgent travel cases should be escalated to Immigration. Do not claim approval or application status unless an authorized system confirms it.

6. Taxpayer Identification Number (TIN)

Responsible authority	Tanzania Revenue Authority (TRA)
Official/primary channels	TRA taxpayer portal: https://taxpayer.tra.go.tz Physical route: TRA tax offices / taxpayer-service desks Payment route: official TRA/GePG instructions
Core services	• Individual TIN registration • Corporate/non-individual TIN • TIN certificate recovery • Profile amendment • Business/taxpayer status changes • TIN-related taxpayer services

Operational summary

TIN registration and subsequent tax obligations are separate concepts. The chatbot should explain the distinction between obtaining a TIN and taxes that may become payable because of a taxpayer's activities.

Escalation and support

For duplicate records, NIDA/TRA mismatches or account problems, direct the user to TRA support or the responsible tax office. Never request passwords or OTPs.

7. Driving Licence Services

Responsible authority	Tanzania Revenue Authority (TRA), with Traffic Police functions for testing/enforcement
Official/primary channels	Primary online route: TRA taxpayer portal/current driving-licence service Physical route: TRA driving-licence offices Testing route: Traffic Police-designated testing points
Core services	• Learner/provisional permit • Driving test • Full driving licence • Renewal • Class addition/extension • Lost/damaged replacement • Foreign-licence conversion where applicable

Operational summary

A typical pathway involves eligibility verification, learner/provisional stage where applicable, driving-school training, Traffic Police testing, payment, biometric/card processing and issuance. Requirements vary by licence class and applicant.

Escalation and support

If test results do not appear online or an application is blocked, refer the user to the responsible TRA desk and, where appropriate, Traffic Police. Verify current fees and validity periods before stating them.

8. Tax Clearance Certificate

Responsible authority	Tanzania Revenue Authority (TRA)
Official/primary channels	TRA taxpayer portal: https://taxpayer.tra.go.tz Physical route: TRA tax office / assigned taxpayer-service officer Verification: use the current TRA verification facility
Core services	• Business/licence-related clearance • Tender/procurement compliance • Asset/vehicle transaction clearance where applicable • Business closure/TIN deactivation clearance

Operational summary

A tax-clearance certificate confirms compliance for a defined purpose. The chatbot should first identify the purpose because required documents and tax checks can differ. Outstanding returns, assessments, penalties, interest or unreconciled payments may prevent clearance.

Escalation and support

If the taxpayer disputes an assessment or has a system-payment problem, direct them to the applicable TRA objection, reconciliation or taxpayer-support process rather than giving legal conclusions.

9. Land Services

Responsible authority	Ministry of Lands, Housing and Human Settlements Development (MLHHSD)
Official/primary channels	e-Ardhi: https://eardhi.lands.go.tz Ministry: https://lands.go.tz Head office: Government City, Mtumba, Dodoma; P.O. Box 2908 Telephone: +255 26 296 3313 / +255 296 3314 Email: ps@lands.go.tz
Core services	• CCRO/customary rights • Granted rights/title services • Surveying and mapping • Valuation • Transfer/consent • Mortgage/charge registration • Subdivision and land-use matters • Land rent • Complaints and disputes

Operational summary

The current e-Ardhi portal supports land-use planning, surveying and mapping, land ownership, title/document registration, valuation, complaints/disputes, applications, payments and tracking. Registration uses NIN and a phone number registered with the NIN.

Escalation and support

e-Ardhi coverage varies by service and rollout area. If a service is unavailable online or involves a dispute, inspection or original documents, direct the user to the relevant land office/local authority.

10. Cross-Service Communication & Escalation

- Level 1 — Chatbot: answer verified general questions, identify the service and explain the next step.
- Level 2 — Official digital portal: direct users to the authority's current portal for applications, tracking, payment or verification.
- Level 3 — Physical office: use when biometrics, original documents, interviews, inspections or disputes require attendance.
- Level 4 — Official contact/help channel: use the authority's published phone, email or contact form.
- Level 5 — Formal escalation: explain the relevant complaint, objection, tribunal or appeal route where applicable.

11. Required Chatbot Behaviour

- Maintain conversation context. Example: after 'What is a passport?', interpret 'Why is it important?' as referring to the passport.
- Support English, Swahili and reasonable mixed-language queries where supported.
- Respond naturally to greetings, thanks and goodbyes while remaining within the service domain.
- Use low-to-moderate creativity for factual government information; accuracy takes priority.
- Use RAG/knowledge retrieval and return the smallest relevant information set.
- Detect service intent and entities such as document type, applicant age and request type.
- Ask clarification questions instead of guessing when a request is ambiguous.
- Do not fabricate fees, laws, offices, phone numbers, processing times or application status.
- Protect sensitive information; never request passwords, OTPs, payment credentials or biometric secrets.
- Clearly distinguish general information from an official government action or decision.

12. Knowledge-Base Maintenance

Metadata field	Purpose	Example
authority	Responsible institution	TRA
service_name	Specific service	TIN registration
eligibility	Who qualifies	Citizen / resident / entity
requirements	Required evidence	NIDA, registration documents
procedure	Workflow	Apply → review → payment → issuance
fees	Current charges	Store with source/date
portal	Official digital channel	Official government URL
physical_location	Where in-person service occurs	Regional/district office
contact	Official support route	Published phone/email
tracking	Status mechanism	Application reference
edge_cases	Exceptional scenarios	Lost document / dispute
source_url	Evidence source	Official authority page
last_verified	Freshness control	YYYY-MM-DD

13. Official Validation Notes

Current official pages checked during preparation confirm the RITA eRITA birth-registration route, NIDA online self-service functions, and the Ministry of Lands/e-Ardhi portal and central contact details. For TRA and Immigration, this master document intentionally avoids embedding unverified phone numbers, fees or detailed operational claims where a current official source was not independently confirmed. These details should be refreshed before production deployment.

The e-Ardhi portal currently publishes its own service scope and Ministry contact information. RITA's official registration page confirms the 90-day birth-registration workflow and its eRITA route. NIDA's official portal confirms NIN lookup and control-number services.
